

Drug & Alcohol Testing Services

As an employer, ensuring the health and safety of your staff is important. This includes not only providing a safe work environment but also ensuring that your employees are fit for their roles and capable of performing their duties safely.

Drug and alcohol testing is a crucial tool in managing this risk within your business. This is especially important in industries where there are significant risks involved, as identified through your risk management process. Implementing drug and alcohol testing as part of your health and safety plan is now more important than ever, including pre-employment, post-incident, and even random testing. By incorporating drug and alcohol testing into your health and safety protocols, you can protect your workforce, minimise risks, and ensure a safe and productive work environment.

We can conduct drug and alcohol tests for you, which are carried out by our accredited staff who follow [AS/NZS 4308:2008 standards](#). We have established a close working relationship with Canterbury Health Laboratories in Christchurch who are a registered and accredited testing laboratory. In the event that a test is non-negative (and at your request), we can send it away to them to confirm the results.

Our Testing Includes:

- Pre-employment
- Random testing programmes
- Reasonable cause
- Rehabilitation
- Post-incident and near miss
- Onsite or at our Opt4 office
- Both male and female testers available
- Available 24/7 and at short notice
- Assisting with drug and alcohol policies
